## **Authorized Summary to BESA Seal of Approval P51 8.0 „Hi Energy Wand Pro 400“ for degenerative energy deficiency**

The BESA tests conducted by IFVBESA on the energetic and physical effectiveness of the "Hi Energy Wand Pro 400" have clearly shown that it is capable of energizing and thus balancing (neutralizing) biologically significant stress factors in the meridians or at the acupuncture points of the test subjects. By means of the bioenergetic system analysis, the effect of the above-mentioned stress factors on the test persons, their meridian systems and their energetic-biological control circuits was scrutinized and systemically tested on the energetic level. The BESA tests BEFORE - AFTER show significant changes at the tested acupuncture points at the meridian system of the test persons. The measurement data as well as their key figures impressively confirm on the one hand the stresses that occur on the human organism, and on the other hand clarify how, after application of the "Hi Energy Wand Pro 400", the deregulating energies are transformed into body-immanent and biocompatible energies.

From a holistic point of view, it may be assumed that the positive effect on the test subjects is also felt by other people. All measured values improved significantly from the mostly 100-percent blue measuring range to the green mostly 50-second range (scale value), i.e. the range of optimal measured values. This means that an optimal regulation dynamic has taken place.

**Result:** The test persons were brought into contact with contaminated objects during the BESA-AFTER testing. In contrast to the BEFORE tests, in which the "Hi Energy Wand Pro 400" was not used, positive measurement results were found throughout, indicating that energization (neutralization) had taken place. The regulation dynamics developed into an optimal effective range.

By demonstrating the energy efficiency of the "Hi Energy Wand Pro 400" in this P51 8.0 project, the requirements for obtaining a BESA seal of approval from the International Professional Association for BESA were met.
