## **Authorized summary to the BESA project WATER HARMONISER W 100 der Hi Energy Serie**

The BESA tests carried out by IFVBESA on behalf of IPC Europe UG on the energetic and physical effectiveness of WATER HARMONIZER W 100 from the "HI Energy" product series clearly showed in the activated state that WATER HARMONIZER W 100 is capable of producing significant energizing (energy-increasing) effects. The BESA tests performed on the energized water showed significant improvements in the measuring circuit as well as a few minutes after drinking the energized water compared to the basic test.

All BESA tests were carried out according to the requirements for the BESA projects or according to the manual for the BESA seal of approval and the BESA concept.

### **results:**

Although the test person was within existing technical interference fields during the BESA testing, a significant energy increase into the optimal measuring range was determined at all body measuring points, independent of the strength of the interference fields.

The measurement data as well as their key figures impressively underpin, on the one hand, the stresses that arise from the environment on our drinking water and thus also on the human organism and, on the other hand, how after introducing the WATER HARMONIZER W 100 into the drinking water, the water was energized and the water structure was transformed into a body-immanent and biocompatible information substance for humans.

This energization can be an important condition for healthy cell activity, oxygen uptake and functional detoxification. The energetic regulation dynamics of the test person developed into the optimal effective range.

This can be seen particularly clearly in the measured values between BESA tests before and after. All measured values improved significantly into the optimal regulation range for humans.

Here, one can clearly speak of a significant improvement of the body's own energy situation in the sense of IFVBESA.

Due to the positive results of the bioenergetic effect of the tested product WATER HARMONIZER W 100 of the HI Energy series, the requirements for the receipt of the BESA seal of approval to the company IPC Europe UG by the International Professional Association for BESA were fulfilled.
